

## Wire-Edge Ribbon Rose

### MATERIALS (for one)

- 2 ft. ribbon

---

## DIRECTIONS

---

1. Cut a 22" length of wire-edge ribbon. Tie a knot in one end; pull taut. Poke copper wire end out along one side at opposite end. Loosely gather ribbon along this wire down to knot as shown.

2. Continue gathering until entire side is ruffled and curling naturally. Leave wire end free, *do not cut off*. Hold knot in left hand and begin to shape rose by wrapping ruffled ribbon around knot. Wrap tightly at first to form a "bud", then continue wrapping loosely so that the rose flares out into an open flower shape.

3. At end, fold raw edge down to meet gathered edge, as shown by dotted line. Secure rose by catching in free end with wire and wrapping around knot tightly; cut off wire end. Adjust rose "petals" as needed by ruffling or crumpling as desired.
